

Tip of the Week

Today's Feature: Stockings & Work Facts about Stockings

Not wearing stocking when it's hot outside isn't a mistake if you get to dress casually elegant at work. But if you are wearing an outfit that calls for stockings, put them on (*working in air conditioning takes any excuse away*)!

How do you know if your outfit calls for stockings? If you are wearing pumps (*even open toes pumps*), sling backs, a suit, a pant suit, or a dress that isn't casual, wear stockings. Even many casual dresses look better with stockings. Also, if you are pretty much "all covered-up" (*long sleeves, not much skin showing at the neck*) bare legs look out of place.

If you don't want to have to wear stockings when it is hot outside, make *absolutely* certain that your work environment will allow you to wear the type of clothing that goes with a no stocking look. And keep your feet, toenails, and legs beautifully groomed -- no exceptions.

Tip: Shave with Super Activated Cleansing Gel

Premiere Collection Cleansing Gelee has an exclusive, natural ingredient "sucrose cocoate" that grips soil and leaves a delicate film behind to help retain moisture. No oils, detergents, or artificial fragrances are used in this very thorough cleanser. Use it in the shower as a body shampoo and as an extraordinary shaving Gelee.

Tip: After Shaving Apply Intense Moisturizing Foot Cream

The enriched Foot Cream serves as the ultimate guard against dryness of the feet. Made from the moisturizing herbal extracts of Aloe Vera Gel, Geranium, Comfrey and Lavender, this rich cream protects foot skin from the drying effects of climatic change and other harsh environmental conditions. Carefully selected essential oils of spicy, mint and floral notes protect and moisturize skin and serve as a natural foot deodorant.
